❖ Event: ShellSeekers

A Capture the Flag (CTF) event in cybersecurity is a professional and engaging competition designed to assess and enhance participants' skills in various aspects of information security. This gamified exercise typically involves participants solving a series of challenges that mimic real-world security scenarios to demonstrate their proficiency in offensive and defensive techniques.

❖ Participants: Solo

❖ Venue: D-Block

❖ Fees: ₹30/-

❖ Main Co-ordinator: Meet Katarmal, Karan Bharda

❖ Faculty: Dr Leena Patel

❖ Rules & Regulations:

- All participants must adhere to respectful and professional conduct throughout the event.
- Organizers reserve the right to disqualify any participant for violating the rules or exhibiting disruptive behaviour.
- Time limits: Strict time limits will be enforced for answering.
- Students are allowed to bring their laptop with them.
- Participants are required to use only the official channels provided by the organizers to submit flags or interact with the competition infrastructure.
- Unauthorized interaction with challenges, such as attempting to disrupt or exploit them outside the defined scope, is strictly prohibited.
- Participants should not share flags or solutions with teams that have not yet solved a particular challenge.
- Participants caught cheating will be disqualified from the competition.

- The scoring system and criteria for ranking participants or teams are usually clearly defined by the organizers.
- **Judges' decisions are final.**

❖ Rounds:

- ROUND 1:
  The participants are given a task to solve the problems with help of clues and the one who get the more correct and accurate answer were declared as winner
